Selangor, Malaysia.

Implantology, made simple
Oral implantology is one of the most rapidly expanding fields in dentistry. This course is intended for the dentist who wants to integrate both the surgical and prosthetic phases of dental implants into their daily practice.

Aims & Objectives

To take dentists, with no previous implant or oral surgery experience being necessary, and provide training to enable them to safely and confidently provide straightforward implant treatment on their own. *Post course mentoring and support will always be available to every participant who successfully completes the course.*

Uniqueness Of The Course

It is a training programme that provides opportunity for participants to place implants in patients and to restore them in a controlled, mentored environment.

- 1 implant placement on model
- Hands-on treatment planning — at least 2 cases.
- Assisting in implant placement — in 1 patient
- Implant placement by the participant — in 1 patient
- Permitted to place extra implants *(Extra charges apply)*
- Experience with CBCT for implant treatment planning
- Patients for the course will be provided by MAHSA University
- Participants can bring their own cases and place implants under guidance *(provided the case is approved by the faculty)*.
Course Programme

COURSE 1—ORAL IMPLANTOLOGY FOR BEGINNERS

Module 1 (2 days)

COURSE 2—BASIC CLINICAL TRAINING IN ORAL IMPLANTOLOGY
(includes COURSE 1 also)
Module 1 to module 4 (6 days)

Course 1  (April 1st and 2nd 2017 ) Module — 1

Basic Implantology And Diagnostics

DAY-1 (April 1st 2017)

An overview of various implant systems, discussions on surgical anatomy, bone physiology, diagnostic methods, patient selection criteria and surgical protocols.

*Hands-on treatment planning exercises for implant treatment (irrespective of systems), In KONE IMPLANT KIT orientation and implant placement on models.*

DAY 2 – (April 2nd 2017)

Familiarize the participants with likely surgical complications, prosthetic options, impression techniques and prosthetic components required for impression and restoration (irrespective of the system).

*Hands-on — prosthetic components and prosthetic techniques (open tray and closed tray techniques) on models.*

Course 2  (April 15th 2017 ) Module - 2

Treatment Planning And Implant Surgery

Aims to provide a sound grounding in concepts of osseointegration, evaluation of cases, radiographic planning for implant placement, etc.

*Hands-on treatment planning exercises with OPG & CBCT and placement of implants in patients under supervision.*
Module 3 - (2nd September 2018)

Implant Prosthetics And Predictable Restorative Techniques

This module covers the prosthetic options for single and multiple teeth, Stage 2 surgery and impression techniques, and complications in prosthetic phase of implant restorations.

Hands-on stage 2 surgery, patient management and impression techniques (special tray preparation and closed tray impression on patient).

Module 4 - (6th and 7th October 2018)

Implant Restorations, Criteria For Success And Advanced Implantology

Familiarization with various types of implants, prosthetic options for complete denture, peri-implantitis, implant maintenance protocols, criteria for success, bone grafts/bone splits, sinus lifts — direct and indirect, Immediate implants and medicolegal implications.

Hands-on: torque requirements and cement/screw retained restorations on patients.

An Overview:

Clinical Skills Taught

- Patient evaluation, Treatment planning skills, Radiographic planning using radiographs as well as CBCT.
- Basic surgical skills including flap design, suturing, implant placement and implant exposure.
- Basic prosthodontics skills including impression techniques, abutment design and managing prosthetic super structure.
- Managing complications in dental implants such as peri-implantitis, prosthetic as well as surgical complications.
- Placing & restoring dental implants under direct supervision of mentors

Cancellation policy. The number of participants is limited for each course. Cancellation after last date of registration or no show will not qualify for refund. If cancelling on or before the last date of registration, 50% of fee will be refunded. MAHSA reserves the right to cancel or postpone the course with up to 1 week’s notice.
Oral implantology training programme

Mode Of Instruction

Lectures, video presentations, hands-on exercises on models and mentor-guided patient treatment for surgical and restorative skills.

Target Population

Course 1 - Dental student, Dental graduate, Clinician
Course 2 - Dental graduate, Clinician

Entry requirements for Course 2 —

• MDC registration, Medico-legal indemnity certificate, APC/TPC.

Registration Fees

Course 1 - RM 3500
  - RM 3000 (Early birds and MAHSA alumni)
Course 2 - RM 8500 (Includes Course 1 also )
  - RM 8000 (Early birds and MAHSA alumni)

Early bird registration - Before March 20th 2018

Last date of registration (Course 1 only) - May 20th 2018

Last date of registration (Course 2) - April 27th 2018

Registration Fees Include:

Entry for the lectures, demonstrations, hands-on training and also the material charges for the implant, 1 abutment, and restoration of the same (including lab charges). Tea, snacks and lunch will be provided.

In case the participant wants to place extra implants, provision can be made according to the availability of patients — with additional charges.

At the end of the course, successful participants will be awarded the Certificate of Attendance from MAHSA University.
Instructors

Prof. Dr. Mohan Alexander MDS, M.O.M.S. R.C.P.S. (Glas):  
A maxillofacial surgeon by profession and a post graduate teacher with more than twenty five years of experience, he has undergone training in implantology, successfully completing the Post graduate Certificate course in Advanced Oral Implantology (PGCAOI) from Manipal University, India.

Prof. Dr. Betsy Sara Thomas MDS: A periodontist and oral implantologist by profession, she was a member of the Nobel Biocare implantology program at Manipal College of Dental Sciences, Manipal, India. Currently she is the head of the department of Periodontology at MAHSA University. She underwent training in advanced oral implantology and obtained the Post Graduate Certificate in the same in 2002 (PGCAOI) from Manipal University, India and has been teaching implantology for the past 14 years. She is a recipient of ISOI fellowship.

Assoc. Prof. Dr. Ravikanth H Jujare MDS has years of clinical and academic experience in Prosthodontics and Implant Dentistry. He completed his Bachelor and Masters from India with a focus on practicing all aspects of Modern Dentistry. He received his Fellowship in Implants and Prosthetic mastership from International Congress of oral Implantologists (ICOI) affiliated programs. He gained his extensive clinical knowledge and experience on all aspects of dentistry from private practice and hospitals. He is familiar with various Implant systems including Basal Implants.
**FREQUENTLY ASKED QUESTIONS**

*For whom is the course intended?*

For dentists interested in providing their patients a total solution in oral rehabilitation and for all those who wish to integrate dental implants into their practice.

*As a beginner in Implantology, would this be an ideal course to start with?*

Yes. This course provides you up to date knowledge without ambiguity to lay a foundation on which to build up your implant practice.

*Will I be allowed to place implants during the course?*

Yes, on models as well as patients, under the guidance of the instructors.
